Strand	Content Descriptions	Code	Strand	Outcomes	Code	NEW	Australian Curriculum v9 Yr 06		
Number	investigate everyday situations that use integers. Locate and represent these numbers on a number line	ACMNA124	Number	recognise situations, including financial contexts, that use integers; locate and represent integers on a number line and as coordinates on the Cartesian plane	AC9M6N01	Y6 Integers	Introducing Integers	Understand integers	
	introduce the Cartesian coordinate system using all four quadrants	ACMMG143		identify and describe the properties of prime, composite and square numbers and use these properties to solve problems and simplify calculations	AC9M6N02		Multiples, factors, primes & composites	Prime, composite & square numbers	
	identify and describe properties of prime, composite, square and triangular numbers	ACMNA122		apply knowledge of equivalence to compare, order and represent common fractions including halves, thirds and quarters on the same number line and justify their order	AC9M6N03	Y6 Fractions Y6 Percentages	Equivalent fractions	Compare & order common fractions	
	compare fractions with related denominators and locate and represent them on a number line	ACMNA125		apply knowledge of place value to add and subtract decimals, using digital tools where appropriate; use estimation and rounding to check the reasonableness of answers	AC9M6N04	Y6 Decimals	Add/subtract decimal and fractions	Add/sub decimals - mental strategies Add/sub decimals - digital technologies Add/sub decimals - written method Add/sub decimals - estimating	
	add and subtract decimals, with and without digital technologies, and use estimation and rounding to check the reasonableness of answers	ACMNA128		solve problems involving addition and subtraction of fractions using knowledge of equivalent fractions	AC9M6N05	Y6 Fractions	Add/subtract decimal and fractions	Add & subtract proper fractions Add & subtract mixed numerals	
	solve problems involving addition and subtraction of fractions with the same or related denominators	ACMNA126		multiply and divide decimals by multiples of powers of 10 without a calculator, applying knowledge of place value and proficiency with multiplication facts; using estimation and rounding to check the reasonableness of answers	AC9M6N06	Y6 Decimals	Fractions, decimals & percentages	Multiply/divide decimals by powers of 10	
	make connections between equivalent fractions, decimals and percentages ➡ MOVED TO Y5	ACMNA131		solve problems that require finding a familiar fraction, decimal or percentage of a quantity, including percentage discounts, choosing efficient calculation strategies and using digital tools where appropriate	AC9M6N07	Y6 Fractions Y6 Percentages	Fractions, decimals & percentages	Find a fraction of a quantity Calculate percentages	
	multiply decimals by whole numbers and perform divisions by nonzero whole numbers where the results are terminating decimals, with and without digital technologies	ACMNA129							
	multiply and divide decimals by powers of 10	ACMNA130							
	find a simple fraction of a quantity where the result is a whole number, with and without digital technologies	ACMNA127							
make connections between equivalent fractions, decimals and percentages ➡ MOVED TO Y5	ACMNA131								
investigate and calculate percentage discounts of 10%, 25% and 50% on sale items, with and without digital technologies	ACMNA132								

Year 6 Australian Curriculum v8.4			Year 6 Australian Curriculum v9			New Courses: Units of Work	Activities (Courses): Topics	Skill Quests	
Strand	Content Descriptions	Code	Strand	Outcomes	Code	NEW	Australian Curriculum v9 Yr 06		
Number			Number	approximate numerical solutions to problems involving rational numbers and percentages, including financial contexts, using appropriate estimation strategies NEW	AC9M6N08		Add/subtract decimal and fractions Fractions, decimals & percentages	Rational numbers & percentages	
	select and apply efficient mental and written strategies and appropriate digital technologies to solve problems involving all four operations with whole numbers	ACMNA123		use mathematical modelling to solve practical problems involving natural and rational numbers and percentages, including in financial contexts; formulate the problems, choosing operations and efficient calculation strategies, and using digital tools where appropriate; interpret and communicate solutions in terms of the situation, justifying the choices made	AC9M6N09	Y6 Fractions Y6 Percentages Y6 Decimals	Fractions, decimals & percentages	Solve practical percentage problems	
Algebra	continue and create sequences involving whole numbers, fractions and decimals. Describe the rule used to create the sequence	ACMNA133	Algebra	recognise and use rules that generate visually growing patterns and number patterns involving rational numbers	AC9M6A01		Algebra patterns equations & rules	Recognise & use rules for patterns	
	explore the use of brackets and order of operations to write number sentences	ACMNA134		find unknown values in numerical equations involving brackets and combinations of arithmetic operations, using the properties of numbers and operations	AC9M6A02		Algebra patterns equations & rules	Understand order of operations	
				create and use algorithms involving a sequence of steps and decisions that use rules to generate sets of numbers; identify, interpret and explain emerging patterns NEW	AC9M6A03			Design flowcharts to solve problems Use rules & algorithms	
Measurement	connect decimal representations to the metric system	ACMMG135	Measurement	convert between common metric units of length, mass and capacity; choose and use decimal representations of metric measurements relevant to the context of a problem	AC9M6M01		Converting metric units	Connect decimals to the metric system Convert metric units of measurement	
	convert between common metric units of length, mass and capacity	ACMMG136		establish the formula for the area of a rectangle and use it to solve practical problems	AC9M6M02		Area and angle	Use formula for area of a rectangle	
	solve problems involving the comparison of lengths and areas using appropriate units	ACMMG137		interpret and use timetables and itineraries to plan activities and determine the duration of events and journeys	AC9M6M03			Interpret & use timetables	
	interpret and use timetables	ACMMG139		identify the relationships between angles on a straight line, angles at a point and vertically opposite angles; use these to determine unknown angles, communicating reasoning	AC9M6M04		Area and angle	Understand angle properties	
	investigate, with and without digital technologies, angles on a straight line, angles at a point and vertically opposite angles. Use results to find unknown angles	ACMMG141							
	connect volume and capacity and their units of measurement MOVED TO Y8	ACMMG138							

Year 6 Australian Curriculum v8.4			Year 6 Australian Curriculum v9			New Courses: Units of Work	Activities (Courses): Topics	Skill Quests
Strand	Content Descriptions	Code	Strand	Outcomes	Code	NEW	Australian Curriculum v9 Yr 06	
Geometry			Space	compare the parallel cross-sections of objects and recognise their relationships to right prisms NEW	AC9M6SP01			Investigate cross-section
	introduce the Cartesian coordinate system using all four quadrants	ACMMG143		locate points in the 4 quadrants of a Cartesian plane; describe changes to the coordinates when a point is moved to a different position in the plane	AC9M6SP02		Shape and space	Points on the Cartesian plane
	investigate combinations of translations, reflections and rotations, with and without the use of digital technologies	ACMMG142		recognise and use combinations of transformations to create tessellations and other geometric patterns, using dynamic geometric software where appropriate	AC9M6SP03		Shape and space	Use combinations of transformations
	construct simple prisms and pyramids REMOVED	ACMMG140						
Statistics	interpret and compare a range of data displays, including side-by-side column graphs for two categorical variables	ACMSP147	Statistics	interpret and compare data sets for ordinal and nominal categorical, discrete and continuous numerical variables using comparative displays or visualisations and digital tools; compare distributions in terms of mode, range and shape	AC9M6ST01		Mode & range	Interpret, compare & describe data sets Compare mode, range & shape
	interpret secondary data presented in digital media and elsewhere	ACMSP148		identify statistically informed arguments presented in traditional and digital media; discuss and critique methods, data representations and conclusions	AC9M6ST02			Interpret & evaluate secondary data
				plan and conduct statistical investigations by posing and refining questions or identifying a problem and collecting relevant data; analyse and interpret the data and communicate findings within the context of the investigation	AC9M6ST03			
Probability	describe probabilities using fractions, decimals and percentages	ACMSP144	Probability	recognise that probabilities lie on numerical scales of 0 – 1 or 0% – 100% and use estimation to assign probabilities that events occur in a given context, using common fractions, percentages and decimals	AC9M6P01		Probability	Assign probabilities
	conduct chance experiments with both small and large numbers of trials using appropriate digital technologies	ACMSP145		conduct repeated chance experiments and run simulations with an increasing number of trials using digital tools; compare observations with expected results and discuss the effect on variation of increasing the number of trials	AC9M6P02			Conduct chance experiments
	compare observed frequencies across experiments with expected frequencies	ACMSP146
